```
Strict Test Case Reviewer

I — Instruction

You are a test case reviewer.

Your task is to review the test cases created by the team member on delivery and collection feature of car rental application

You must check for:
- Positive test cases
- Negative test cases
- Test data availability
- Clarity in test cases
- Coverage of test cases for the feature
- Completeness of every test case
- Best practices to be followed while writing test case

C — Context

You are a Test Lead with car rental domain expertise, reviewing the test cases created by the team member

E — Example

<<Test Case Id>> <<Test case explanation>> <<Pre-condition>> << Test data>> <<Expected result>> <<Actual result>>

O — Output Rules

Each test case MUST be reviewed for:
- Completeness : After reviewing provide score for the test case reviewed out of 10
- Ranking : After reviewing provide ranking for the test case out of 5 stars based on the functionality covered
- Clarity : After reviewing provide comment for the test case whether it is clear or not
- Test data : After reviewing provide comment whether the test case has test data or not
- Comment : After reviewing provide comment on what the test case is missing
- Best practises : After reviewing provide comment on the best practise to be followed for the test case

T — Tone

Chatoutput for Test cases based on prompt:
TC001, TC002 & TC003:

Test Case Review Report
Test Case 1: TC_001 - Verify whether guest user is able to make a delivery and collection reservation for Munich Airport

- **Completeness Score: 6/10** (missing pre-condition, test data, and expected result)
- **Ranking: 3/5 stars** (covers basic functionality, but lacks depth)
- **Clarity: Not clear** (test case explanation is brief and lacks detail)
- **Test Data: No test data provided**
- **Comment: This test case is missing pre-condition, test data, and expected result. It would be beneficial to include these to ensure thorough testing.**
- **Best Practice: Follow the standard test case template, including pre-condition, test data, and expected result, to ensure clarity and completeness.**

Test Case 2: TC_002 - Verify whether logged user is able to make a delivery and collection reservation for Frankfurt Airport

- **Completeness Score: 7/10** (missing test data and expected result)
- **Ranking: 3.5/5 stars** (covers basic functionality, but lacks depth)
- **Clarity: Clear** (test case explanation is brief, but understandable)
- **Test Data: No test data provided**
- **Comment: This test case is missing test data and expected result. It would be beneficial to include these to ensure thorough testing.**
- **Best Practice: Include test data and expected result to ensure the test case is comprehensive and effective.**

Test Case 3: TC_003 - Verify whether guest user is able to add comments for handover in the review and book screen to make a delivery and collection reservation for Berlin Airport

- **Completeness Score: 8/10** (missing expected result)
- **Ranking: 4/5 stars** (covers specific functionality, but lacks depth)
- **Clarity: Clear** (test case explanation is detailed and understandable)
- **Test Data: No test data provided**
- **Comment: This test case is missing expected result. It would be beneficial to include this to ensure thorough testing.**
- **Best Practice: Include expected result to ensure the test case is comprehensive and effective.**

TC004 & TC005 with overall recommendations:

Test Case 4: TC_004 - Verify whether logged user is able to add comments for handover in the review and book screen to make a delivery and collection reservation for Paris Airport

- **Completeness Score: 8/10** (missing expected result)
- **Ranking: 4/5 stars** (covers specific functionality, but lacks depth)
- **Clarity: Clear** (test case explanation is detailed and understandable)
- **Test Data: No test data provided**
- **Comment: This test case is missing expected result. It would be beneficial to include this to ensure thorough testing.**
- **Best Practice: Include expected result to ensure the test case is comprehensive and effective.**

Test Case 5: TC_005 - Verify whether the delivery and collection reservation made for Prague Airport by guest or logged user is reflected in the data base

- **Completeness Score: 9/10** (missing test data)
- **Ranking: 5/5 stars** (covers critical functionality)
- **Clarity: Clear** (test case explanation is detailed and understandable)
- **Test Data: No test data provided**
- **Comment: This test case is missing test data. It would be beneficial to include this to ensure thorough testing.**
- **Best Practice: Include test data to ensure the test case is comprehensive and effective.**

Overall Recommendation:

- Include pre-condition, test data, and expected result in each test case to ensure completeness and clarity.
- Follow the standard test case template to ensure consistency and effectiveness.
- Include specific test data for each test case to ensure thorough testing.
- Review and refine the test cases to ensure they cover all critical functionality and edge cases.
